

SCAN OPTIMIZE GROW

Boost your sawmill's performance with high-precision 2D and 3D scanning systems.

LynxScan combines AI, industrial intelligence, and real-time data analysis to detect defects, optimize cuts, and extract maximum value from each log or board.

LYNXSCAN TECHNOLOGY

We are a company specialized in industrial scanning systems for the timber sector, helping sawmills optimize every step of the production line.

Our solutions combine AI, vision technology, and real-time data to improve efficiency, quality, and profitability.

Sawmills

Smart scanning solutions to optimize yield, reduce waste, and improve production flow and decision-making.

Engineered Wood

Advanced defect detection and automated classification for CLT, LVL, and structural wood processing lines.

LS-301-PRO

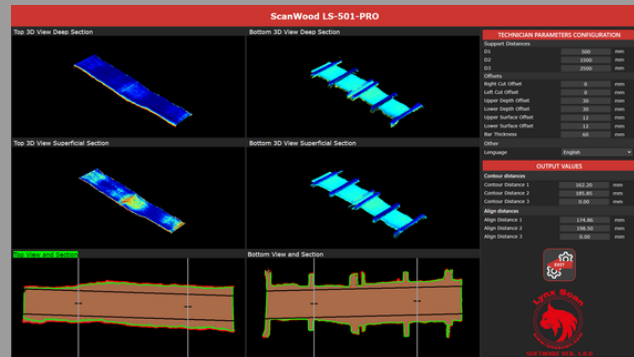

Smart 3D log scanner

- ✓ 3D wood volume scanner
- ✓ Full production database
- ✓ Measures minimum, maximum and average diameter
- ✓ Log length
- ✓ Curvature
- ✓ 3D taper
- ✓ Log counting by minute, hour and day
- ✓ Ejector control to boxes

LS-501-PRO

Designed for maximize every board

- ✓ Scanning of up to 6 sides
- ✓ Detection of **geometric** and **biological** defects
- ✓ Integrated automatic cutting optimization
- ✓ Data transmission to machines
- ✓ Feed speed: up to 120 m/min
- ✓ Length: from 1200 to 6500 mm
- ✓ Width: from 40 to 800 mm

OPTIMIZE YOUR PRODUCTION NOW

www.lynxscan.com

LS-201-PRO

Fast and accurate 2D cuber

- ✓ 2D wood volume scanner
- ✓ Full production database
- ✓ Measures minimum, maximum and average diameter
- ✓ Log length
- ✓ 2D taper
- ✓ Log counting by minute, hour and day
- ✓ Ejector control to boxes

WHY CHOOSE LYNXSCAN?

LynxScan delivers smart, precise and connected scanning systems that help sawmills and wood processors improve efficiency, reduce waste, and make better decisions.

Traceability from start to finish

Automated decisions for max yield

Full visibility of every log or board

Less waste, more profit

LYNXSCAN TECHNOLOGY

Smart scanning systems for sawmills and engineered wood industries.

More control. Less waste.
Better decisions.
